

Get to the root of your IgA Nephropathy (IgAN).

Consider joining the ORIGIN clinical research study, which is exploring a potential new medication for people with IgAN.

You may be able to participate if you meet the following requirements*:

- You are 18 years of age or older, or you meet your country's legal adult age
- You have a diagnosis of IgAN, confirmed by a kidney biopsy within the past 10 years
- You have been on a stable, prescribed regimen of an RAASi (for example, ACE/ARB) medication for at least 12 weeks

*Additional requirements will apply.

Study participants receive at no cost:

- Once-weekly injections of the study medication or placebo*
- Regular assessments at the study clinic
- Study support and monitoring by a healthcare team
- The opportunity to help advance IgAN research

*Participants will begin an Open-Label Extension Period 36 weeks (about 9 months) after the first dose of the study medication or placebo. During this period, **each participant** receives the study medication and will continue to visit the study clinic regularly for assessments.
